### **DETAILED ACTION**

1. This action is in response to the communication filed on 10/12/05.
2. Claims 1-5 are pending in this action.

### ***Allowable Subject Matter***

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance

**As per claims 1-5:** the claims are directed to dynamic channel allocation. The prior art of record does not fairly teach or suggest a time notifying section comprised in a mobile communication controller for notifying a base station and a mobile station a time for switching to a set state of a communication speed, as recited in claims 1-5. A closely related reference, submitted by applicant as an IDS, a Japanese Laid –Open Patent Publication No. 8-274756, indicates a rate change and timing notification by a base station to a host mobile terminal based on an estimate of a downlink channel provided by the mobile terminal. The instant claims are directed to, mainly a mobile communication controller (other than the base station) notifying the transmission rate change and associated changing time to both the base station and the mobile terminal. The mentioned prior art is does not teach or suggest the use of the rate changing and time notification technique in other environment or embodiment. The instant claims are thus view as an improvement over the above reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
